

CHREOS SERVICE PACK 25

Service pack 25 primarily contains a number of corrections and minor adjustments to existing features.

Chreos Server

The performance and stability when importing large numbers of items has been radically improved.

Debtor invoices

The problem introduced in SP24 that limited the number of invoices that could be printed at time of creation has been corrected

Point Of Sale

Client address and warning messages are now shown when a client is selected when hiring an item, or identifying a payment method.

Summary Creditor Invoice

A small rounding error on inclusive items has been addressed.

View Client orders

This now shows the number of days remaining to required supply date. The required date goes red if item is late.

Discounting

Specified item assorted Stock bins now trigger correctly for discounts that start at one item.

A precision / rounding error when calculating the Bin price of an item has been fixed.

Clients / Invoice

Automatic credit note creation now handles freight correctly and assumes that the freight is to be refunded. This can be over-ridden.

Debtor Invoice

A problem in the Item find component where the order of items was lost on second and subsequent searches has been fixed.

Jobs

Jobs closed or cancelled are now marked as ending on the current sales date.

Cancel Job now only functions if no Active item lines exist.

Inwards Goods

Creditors with a default tax method of Inclusive now correctly set new items to Inclusive.
